education
through **MUSIC**
colorado

Education Through Music (ETM) is a **national nonprofit network** that launched programming more than **30 years ago** in **New York** followed by expansion to **Los Angeles** and, more recently, **Colorado**. Since its founding, more than **300,000 students** have studied music, and through it, how to express themselves.

LET'S BRING MUSIC BACK TO PUBLIC SCHOOLS!

In many Colorado schools, the hallways, classrooms, and auditoriums have gone quiet. Music education has become a luxury and thousands of children are growing up with increasingly unequal opportunities to thrive. **We are closing this gap by integrating weekly music classes into the core curriculum of under-resourced schools.** We build multi-year sustainable programs that help students' creativity and growth flourish while inviting families to become involved. **The result for students is cognitive development, academic achievement and emotional wellbeing.**

Over the past five years, **we've launched music programs in 8 schools** in Denver and Aurora. **More than 2,500 students** are now benefiting from ETM-Colorado music classes on a weekly basis.
